

OUR MISSION

Our vision is to have a comprehensive and agnostic healthcare platform, blending blockchain and software solutions that enable improved outcomes for patients and healthcare providers. Medica will create the open and distributed data marketplace for patients to monetize access to their data and allow healthcare providers and research organizations to seamlessly and cost-effectively access pertinent Medical data in a trust-less environment.

MARKET

“Data is the new oil”

\$3 Trillion
Global Data Economy

90%
Of the data was produced over the past 2 years

1 Billion
Google Maps Monthly Users

“Data is crude, unrefined and hard to find”

80%

of online listings display inaccurate or missing data

ONLY 0.5%

of all the data available has ever been analyzed and used

ONLY 8%

of map pin placements are correct

WHO CREATES THIS DATA ?

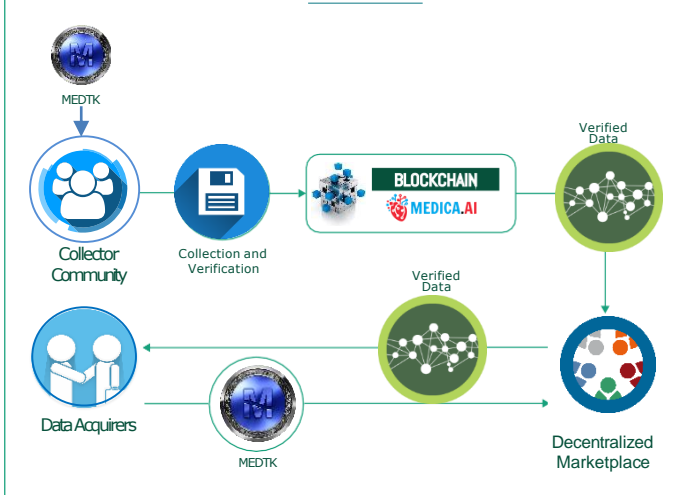

Without even realizing it, humans have become instruments of data collection through their actions, behaviors and movements.

WHAT WE DO

Medica.ai community is the backbone of data collection. Validated through a blockchain-based process, the data is made accessible in a decentralized marketplace.

We are democratizing access, as data acquirers can obtain reliable and accurate data in real time and data collectors are rewarded for the data they generate.

How It Works

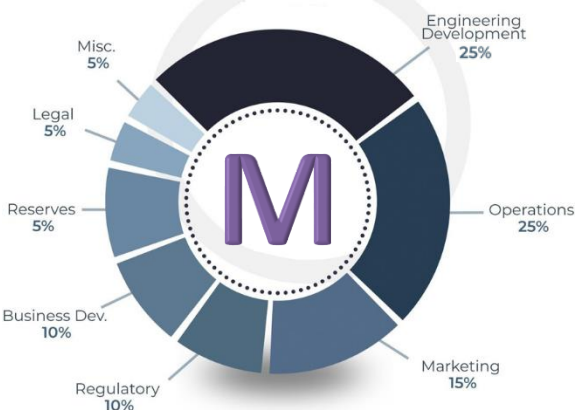

TOKEN- MEDTOKEN-MEDTK

Token Distribution

Total of: 100,000,000 Tokens

MEDTK FUNDS ALLOCATION

Use of Proceeds

CONCLUSION

With Medica, humans are rewarded for the data they generate. We will change the existing paradigm so that data generation will no longer be exploited by large corporations at the expense of individuals creating the data.

Supported by millions of people around the world, Medica will be the ultimate data platform reference. Humans will be its main resource as they will fully integrate the data ecosystem.

PARTNERS
